# Getting Started With Checklists in the ThermoWorks App and Cloud

Before connecting a Bluetooth<sup>®</sup> Probe to the ThermoWorks App, follow these simple steps for best results:

#### Step 1: Create a ThermoWorks Cloud Account on a Paid Tier

Go to <u>cloud.thermoworks.com</u> on your browser, create an account and sign up for the Pro Tier (only \$9 per month for up to 10 devices), Business Pro or Business Pro Plus Tier. See the <u>ThermoWorks Cloud page</u> for more information on cloud tiers.

### Step 2: Create your checklists in the ThermoWorks Cloud

Create an unlimited number of checklists in the Cloud on your browser with all your food items and yes/no questions and your preferred corrective actions and they will be accessible automatically in the ThermoWorks app on your devices after login.

# Step 3: Download the ThermoWorks App

ThermoWorks App works with Android 9.0 and above.

## Step 4: Open Checklists in the ThermoWorks App

Log in to the ThermoWorks App using the same login for the ThermoWorks Cloud, and access the Checklist menu from the upper left drop-down menu and select **Checklists (Beta)** to run your checklists and connect ThermoWorks Bluetooth probes.

## Step 5: Run Checklists in the App and Select a Device

Select **Run** next to the checklist you want to run, then **Select a device** to choose a device from the list of Bluetooth devices that are turned on and in proximity to your phone or tablet. You're now ready to run your checklist.
